OVATION POLYMERS DEBUTS SIX PRODUCT LINES INTO THE ELECTRONICS INDUSTRY

Breakthrough Polymer Innovations

Ovation Polymers is focusing on the electronics industry by making their debut at several of the nations most influential exhibitions. With a portfolio of six product lines that synergistically benefit the electronics industry, Ovation Polymers has built a solid platform to become an industry leader.

OpteSTAT™ – carbon nanotube based electrically conductive compounds and composites.

Nemcon™ E – Electrically conductive compounds.

Nemcon™ H – Thermally conductive compounds.

Uttap™ – High performance alloys, blends, and composites.

LSE Series – Self-lubricated, wear resistant compounds.

Nima™ – Flame retardant compounds and masterbatches.

Visit us at these upcoming events:

ESD/ESD Symposium September 17-19, 2007, Anaheim, CA (Booth 417-418)

Is the international technical forum on electrical overstress and electrostatic discharge that features research, technology, and solutions to increase understanding, enhance quality and reliability, reduce and control costs, and improve yields and productivity.

DISKCON USA 2007 September 19-20, 2007, Santa Clara, CA (Booth 503)

DISKCON USA 2007 brings together hard drive and solid state companies under one roof, giving you the opportunity to view the latest technologies enabling Hard Disk Drive (HDD) and Solid State Drive (SSD) applications, including computing and consumer electronic applications.

Nano App Summit October 22-25, 2007, Cleveland, OH

Nano App 2007 is the most applications focused nanotechnology event of the year, addressing industry-specific applications in Automotive, CleanTech and Defense sectors. Major manufacturers, leading nanotechnology product developers, and industry experts share product enhancements, insight on current market demands, commercialization opportunities, and much more.

NanoCon International November 14-16, 2007, Santa Clara, CA

Small Times NanoCon International's unique conference program covered the latest information in business strategy and cutting-edge industry developments, providing you with critical insight into the future of the commercial sector of the nanotech industry.
